

On approval of the Rules for subsidizing the development of livestock breeding, increasing the productivity and quality of livestock products

Unofficial translation

Order of the Minister of Agriculture of the Republic of Kazakhstan dated March 15, 2019 № 108. Registered with the Ministry of Justice of the Republic of Kazakhstan on March 20, 2019 № 18404.

Unofficial translation

In accordance with subparagraph 41) of paragraph 1 of Article 6 of the Law of the Republic of Kazakhstan “On State Regulation of the Development of the Agro-Industrial Complex and Rural Territories”, subparagraph 2) of paragraph 3 of Article 16 of the Law of the Republic of Kazakhstan “On State Statistics” and subparagraph 1) of Article 10 of the Law of the Republic of Kazakhstan “On State Services” **I HEREBY ORDER:**

Footnote. The preamble is in the wording of the order of acting Minister of Agriculture of the Republic of Kazakhstan dated 13.07.2021 № 207 (shall be enforced upon expiry of ten calendar days after the day of its first official publication).

1. To approve the attached Rules for subsidizing the development of livestock breeding, increasing the productivity and quality of livestock products.

2. To recognize as terminated Order of the Deputy Prime Minister of the Republic of Kazakhstan - Minister of Agriculture of the Republic of Kazakhstan dated June 15, 2018 № 256 “On approval of the Rules for subsidizing the development of livestock breeding, increasing productivity and quality of livestock products” (registered in the Register of State Registration of Regulatory Legal Acts under № 17306, published on September 3, 2018 in the Reference Control Bank of Regulatory Legal Acts of the Republic of Kazakhstan).

3. Department of Production and Processing Livestock products of the Ministry of Agriculture of the Republic of Kazakhstan in the manner prescribed by law shall:

1) ensure state registration of this order with the Ministry of Justice of the Republic of Kazakhstan;

2) within ten calendar days from the date of the state registration of this order, send it both in Kazakh and Russian languages to the Republican State Enterprise on the Right of Economic Management “Republican Legal Information Center” for official publication and inclusion in the Reference Control Bank of Regulatory Legal Acts of the Republic of Kazakhstan;

3) within ten calendar days after the state registration of this order, send its copy for official publication in periodicals;

4) place this order on the Internet resource of the Ministry of Agriculture of the Republic of Kazakhstan after its official publication;

5) within ten working days after the state registration of this order, submit to the Department of Legal Services of the Ministry of Agriculture of the Republic of Kazakhstan the information on the implementation of measures provided for by subparagraphs 1), 2), 3) and 4) of this paragraph.

4. Control over the execution of this order is assigned to the Supervising Vice Minister of Agriculture of the Republic of Kazakhstan.

5. This order shall come into effect after the day of its first official publication.

Minister of Agriculture of the
Republic of Kazakhstan dated
March 15, 2019 № 108

The Rules

for subsidizing the development of livestock breeding, increasing productivity and quality of livestock products

Footnote. The Rules are in the wording of the Order of the Minister of Agriculture of the Republic of Kazakhstan dated 18.09.2023 № 332 (effective from 01.01.2024).

Chapter 1. General provisions

1. These Rules for subsidizing the development of livestock breeding, increasing productivity and quality of livestock products (hereinafter – the Rules) have been developed in accordance with subparagraph 41) of paragraph 1 of Article 6 of the Law of the Republic of Kazakhstan "On state regulation of the development of the agro-industrial complex and rural territories", subparagraph 1) of Article 10 of the Law of the Republic of Kazakhstan "On public services" (hereinafter – the Law) and determine the procedure for granting budget

subsidies (hereinafter – the subsidies) at the expense and within the limits of funds provided in the local budget for the relevant financial year, as well as the procedure for providing public services "Subsidizing the development of livestock breeding, increasing productivity and quality of livestock products" (hereinafter – the public service).

2. The following basic concepts are used in these Rules:

1) special commission – a commission created at the level of regions, the cities of Astana, Almaty and Shymkent, which is formed from representatives of: the regional chamber of entrepreneurs of the National Chamber of Entrepreneurs of the Republic of Kazakhstan "Atameken" (hereinafter – NCE "Atameken"), public industry unions/associations/republican chambers and specialists of the structural unit of the local executive body of the regions, the cities of Astana, Almaty and Shymkent (hereinafter – LEB (service provider)), and determines the production capacity and reconciles the availability of appropriate infrastructure, issuance and withdrawal of conclusions from the manufacturer;

2) the database on the identification of farm animals is a part of veterinary accounting, providing for a single, multi-level system for registering data on the individual number of the animal, on its veterinary treatments, including the results of diagnostic studies, as well as data on the owner of the animal, carried out by state veterinary organizations established by local executive bodies, and used by the authorized body in the field of veterinary medicine;

3) feedlot – the production infrastructure of an agro-industrial complex entity intended for fattening animals, having an accounting number assigned in accordance with the Rules for assigning accounting numbers to production facilities engaged in animal husbandry, fattening (slaughter), storage, processing and sale of animals, products and raw materials of animal origin, as well as organizations for the production, storage and sale of veterinary drugs, feed and feed additives, approved by the Order of the Minister of Agriculture of the Republic of Kazakhstan dated January 23, 2015 № 7-1/37 (registered in the Register of state registration of regulatory legal acts № 10466);

4) information system of the unified state cadastre of real estate – an information system containing information on land and legal cadastres, whose maintaining procedure is determined by the Land Code of the Republic of Kazakhstan and the Law of the Republic of Kazakhstan "On state registration of the rights to immovable property";

5) targeted use – the use of animals purchased and declared for subsidies for reproduction purposes on the terms and within the time specified in these Rules;

6) zootechnical disposal rate – natural loss (epizootic death), forced slaughter in accordance with the norms of natural loss (epizootic death) of farm animals, approved by the Order of the Minister of Agriculture of the Republic of Kazakhstan dated December 3, 2015 № 3-3/1061 (registered in the Register of state registration of regulatory legal acts № 12488), as well as culling of livestock of farm animals recommended by a specialized scientific

organization for animal husbandry and feed production (the number of cattle of meat and meat-dairy directions is 20%; the number of dairy and dairy-meat cattle – 35%; the number of sheep – 25%; the number of marals (deer) – 25%; the number of pigs – 30%);

7) the information base of breeding and breeding work is an automated system for collecting, accumulating and processing data on breeding animals and on animals involved in the breeding process, used to improve and increase the genetic potential of animals, as well as for accounting for breeding products (material), accompanied by an operator designated by the authorized body in the field of livestock breeding in accordance with subparagraph 34) of Article 1 of the Law of the Republic of Kazakhstan "On livestock breeding";

8) breeding stock involved in breeding and breeding work – livestock that has reached puberty (for cattle breeding: breeding animals – from 13 months, commercial animals – from 18 months, for horse breeding – from 36 months, for camel breeding – 36 months, for sheep breeding – from 12 months, for maral breeding (deer breeding) – from 24 months, for pig breeding: and commercial – from 8 months, repair livestock – from 4 months), used for the reproduction of the herd;

9) recipients of subsidies (hereinafter referred to as a commodity producer) – an individual or legal entity engaged in the production of agricultural products; an individual or legal entity engaged in the reproduction of animals with high genetic potential, their conservation and breeding (livestock breeding); a breeding center, a distribution center for the sale of semen and embryos of breeding animals, an inseminator technician providing artificial insemination services for breeding stock of farm animals;

10) the electronic register of applications for subsidies (hereinafter – the register) – a set of information about applications for subsidies, and other information reflected in the SSIS;

11) the state subsidy information system (hereinafter referred to as SSIS) is an organizationally ordered set of information and communication technologies posted on the Internet, service personnel and technical documentation designed to provide services for the implementation of subsidy processes, providing the opportunity to interact with the e-government web portal, register an application for subsidies, as well as its automated processing in electronic form;

12) pedigree transformation – improvement of pedigree and productive qualities of farm animals by cross-breeding of commercial breeding stock with breeding producers;

13) breeding season – the mating period of the breeding stock to receive offspring;

14) the e-government web portal is an information system that represents a single window of access to all consolidated government information, including the regulatory framework, and to public services, services for issuing technical specifications for connection to the networks of natural monopoly entities and services of quasi-public sector entities provided in electronic form;

15) an electronic digital signature (hereinafter referred to as an EDS) is a set of electronic digital symbols created by means of an electronic digital signature and confirming the authenticity of an electronic document, its belonging and the immutability of its content.

3. Subsidies are carried out according to the list and standards of subsidies in accordance with Annex 1 to these Rules.

Subsidies are paid on the basis of a submitted application that meets the criteria for producers applying for subsidies (hereinafter referred to as the criteria) specified in Annex 2 to these Rules at the time of submission.

4. The Ministry of Agriculture of the Republic of Kazakhstan (hereinafter referred to as the Ministry), within 3 (three) working days from the date of amendment of these Rules, updates information on the procedure for providing public services and sends information to the LEB (service providers), the operator of the information and communication infrastructure of the "electronic government" and to a Unified contact center.

5. In the case of failure of the SSIS, which contains the necessary information for the issuance of subsidies, the service provider immediately notifies the Ministry of the situation that has arisen, which proceeds to eliminate it.

At the same time, after carrying out work to eliminate the failure, the Ministry within 3 (three) working days draws up a protocol on the technical problem and places it in the SSIS.

Chapter 2. Procedure for formation and distribution of subsidies

6. The formation and distribution of subsidy volumes shall be carried out by the LEB (service provider) in accordance with the types and standards of subsidies established in Appendix 1 to these Rules, based on information provided by local executive bodies of districts/cities on the need for subsidy volumes for the current year, taking into account the final volumes of subsidies for the previous year and the availability of budget funds.

The proposed amounts of subsidies shall be signed by the EDS of the head of the LEB (service provider) no later than January 10 of the corresponding year and sent via SSIS for approval to the Ministry.

Footnote. Paragraph 6 – as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

7. The Ministry shall, within two (2) working days, review the amounts of subsidies provided for compliance with Annex 1 to these Rules.

In case of compliance with the subsidy standards established in accordance with Annex 1 to these Rules, the Ministry, through the SSIS, coordinates the amounts of subsidies submitted by the LEB (service provider).

In case of non-compliance with the standards of subsidies established in accordance with Annex 1 to these Rules, the identification of incorrect calculations in the allocation of subsidies, the Ministry, through the SSIS, sends a reasoned conclusion to the LEB (service provider) indicating the reasons for refusal.

The deadline for finalizing the amount of subsidies by the LEB (service provider) is 3 (three) working days.

8. After agreeing on the amount of subsidies, the LEB (service provider) places them on its official Internet resource within 2 (two) working days.

9. When allocating additional funds or reducing the previously agreed budget, LEB (service provider) shall make appropriate changes and (or) additions to the amounts of subsidies in the manner prescribed by paragraphs 6 and 7 of these Rules, with the corresponding decision of the maslikhat and written justification signed by the deputy akim attached.

Footnote. Paragraph 9 – as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

10. Standards for subsidies to reduce the cost of feed for livestock, as well as criteria for receiving subsidies, the application form and deadlines for submitting applications shall be approved by a resolution of LEB (service provider) based on the recommendations of a specialized scientific organization for animal husbandry and feed production.

Footnote. Paragraph 10 – as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

Chapter 3. Conditions for obtaining subsidies

11. Subsidies are paid to:

- individuals and legal entities engaged in the production of agricultural products;
- individuals and legal entities engaged in the reproduction of animals with high genetic potential, their conservation and breeding (livestock breeding);
- breeding centers, distribution centers for the sale of seeds and embryos of breeding animals, insemination technicians providing services for artificial insemination of breeding stock of farm animals.

12. To apply for subsidies, a commodity producer must register with the SSIS. A commodity producer registers independently, using an EDS.

13. For registration in the Personal account, the commodity producer shall specify the following information:

- 1) for individuals (individual entrepreneurs): individual identification number (hereinafter – IIN), surname, first name and patronymic (if any);
- 2) for legal entities: business identification number, full name; surname, first name and patronymic (if any) and IIN of the first head;
- 3) contact information (postal address, phone, e-mail address);
- 4) details of the current account at the second-tier bank.

If the above data is changed, the commodity producer changes the data entered into the Personal account within 1 (one) working day.

14. Subsidies are paid subject to the following conditions:

1) submitting an application in electronic form through the interaction of the e-government web portal with SSIS:

to receive subsidies for the purchase of: breeding broodstock of cattle (dairy, dairy-meat, meat and meat-dairy directions), breeding bull-producer (meat and meat-dairy directions), breeding sheep, breeding ram-producer, breeding stallion-producer of productive directions, breeding camel-producer, breeding boar producer, breeding pigs, breeding stock of goats, breeding diurnal young stock of the parent/progenitor form of the meat direction of birds and diurnal young stock of the final form of the egg direction obtained from breeding poultry in accordance with form 1 according to Annex 3 to these Rules;

to receive subsidies from breeding centers, distribution centers for the sale of seeds and embryos of breeding animals and insemination technicians for services in artificial insemination of breeding stock of cattle/sheep of commodity producers and in agricultural cooperatives in form 2 according to Annex 3 to these Rules;

to receive subsidies for conducting breeding and breeding work with commercial breeding stock of cattle in form 3 in accordance with Annex 3 to these Rules;

to receive subsidies for conducting breeding and breeding work with breeding stock of cattle in form 4 in accordance with Annex 3 to these Rules;

to receive subsidies for conducting breeding and breeding work with breeding stock of sheep in form 5 in accordance with Annex 3 to these Rules;

to receive subsidies for conducting breeding and breeding work with commercial breeding stock of sheep in form 6 in accordance with Annex 3 to these Rules;

to receive subsidies for conducting breeding and breeding work with breeding and commercial breeding and repair livestock of pigs in form 7 in accordance with Annex 3 to these Rules;

to receive subsidies for conducting breeding and breeding work with breeding stock of marals (deer) in form 8 in accordance with Annex 3 to these Rules;

to receive subsidies for conducting breeding and breeding work with bee colonies in form 9 in accordance with Annex 3 to these Rules;

to receive subsidies for the purchased mono-sex and androgenous seed of breeding bulls of dairy and dairy-meat directions in accordance with form 10 in accordance with Annex 3 to these Rules;

to receive subsidies for reducing the cost of purchasing cattle and sheep embryos in form 11 in accordance with Annex 3 to these Rules;

to receive subsidies to reduce the cost of poultry production in accordance with form 12 in accordance with Annex 3 to these Rules;

to receive subsidies to reduce the cost of dairy production (cow, mare, camel) in form 13 in accordance with Annex 3 to these Rules;

to receive subsidies to reduce the cost of dairy production by agricultural production cooperatives in form 14 in accordance with Annex 3 to these Rules;

to receive subsidies to reduce the cost of sold beef by meat processing enterprises engaged in slaughter and primary processing of beef in accordance with form 15 in accordance with Annex 3 to these Rules;

to reduce the cost of male cattle sold for fattening in feedlots or for slaughter in meat processing enterprises in accordance with form 16 in accordance with Annex 3 to these Rules;

to reduce the cost of small cattle of male individuals sold for fattening in feedlots or for slaughter in meat processing enterprises in accordance with form 17 in accordance with Annex 3 to these Rules;

to receive subsidies to reduce the cost of feed costs for livestock farm animals in form 18 in accordance with Annex 3 to these Rules;

2) registration of the submitted application in the SSIS using EDS;

3) compliance of the application with the criteria set out in Annex 2 to these Rules.

The list of basic requirements for the provision of public service "Subsidizing for the development of livestock breeding, increasing productivity and quality of livestock products" is set out in Annex 4 to these Rules (hereinafter – the List).

The information interaction of the e-government web portal and SSIS is carried out in accordance with Article 43 of the Law of the Republic of Kazakhstan "On informatization".

14-1. Producers receiving subsidies shall comply with obligations to ensure growth/maintain the volume of gross output (goods or services) of the agro-industrial complex at the level of the previous year, in monetary terms (thousands of tenge).

The volume of gross output (goods or services) of the agro-industrial complex shall be determined by the following formula:

Volume of gross output (goods or services) of the agro-industrial complex = volume of manufactured output (goods or services) of the agro-industrial complex for the previous year, thousand tons x producer price for output of the agro-industrial complex in the previous year, thousand tenge.

In case of failure to fulfill obligations during the previous 2 (two) years in a row, the possibility of applying for a subsidy in the current calendar year shall be terminated.

In case of failure to fulfill the obligation due to force majeure (worsening of natural and climatic conditions, phytosanitary and epizootic situations), the manufacturer shall send to LEB (service provider) a document confirming this fact (a certificate of weather conditions issued by the republican state enterprise on the right of economic management "Kazhydromet" of the Ministry of Ecology and Natural Resources of the Republic of Kazakhstan and (or) a decision of LEB on the establishment of quarantine or restrictive measures and (or) an expert report (test report) on the detection of animal disease and (or) a report on damage to crops by pests and plant diseases).

In the absence of documents confirming the occurrence of a force majeure circumstance during the previous 2 (two) consecutive years, the possibility of applying for a subsidy in the current calendar year shall be terminated.

Data on producer prices for agricultural products for the previous year according to the official statistical information of the Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan shall be posted in the SSIS by the developer of these Rules no later than January 20 of the year following the reporting year.

Information on the volume of gross output (goods or services) of the agro-industrial complex shall be filled in by the manufacturer in the Personal Account using the form in accordance with Appendix 4-1 to these Rules before applying for subsidies between January 20 and the end of the current year. This indicator is not subject to adjustment.

The level of fulfillment of obligations by the manufacturer shall be recorded in SSIS.

Footnote. Chapter 3 has been supplemented with paragraph 14-1 in accordance with the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.01.2025).

15. Excluded by order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

16. Confirmation of the purchase of breeding products (material), and sale of livestock/products shall be carried out by electronic invoices through the electronic invoice information system (hereinafter referred to as the EI IS), integrated with the SSIS.

When a producer purchases livestock directly from a foreign producer who does not use the EI IS, the costs of the purchase shall be confirmed by a customs declaration for goods (from third countries that are not members of the Eurasian Economic Union) or a statement (statements) on the import of goods and payment of indirect taxes with a mark from the tax authority in accordance with paragraph 2 of Article 456 of the Code of the Republic of Kazakhstan "On Taxes and Other Mandatory Payments to the Budget" (Tax Code) (from the territory of the member states of the Eurasian Economic Union).

Footnote. Paragraph 16 – as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

17. Poultry farms /feedlots / dairy farms/ agricultural production cooperatives engaged in milk storing / meat processing enterprises with a slaughter capacity of 50 heads of cattle or 300 heads of sheep receive the conclusion of a special commission for compliance with the production capacity and infrastructure of a commodity producer applying for subsidies (hereinafter - the conclusion) in the form according to the annex 5 to these Rules. The procedure for the formation and work of the commission is regulated by the decision of NCE "Atameken". The composition of the special commission is formed taking into account the exclusion of conflicts of interest in the activities of the special commission.

18. A special commission determines the production capacity of the enterprise, as well as verifies the availability of the appropriate infrastructure of enterprises in accordance with Annex 5 to these Rules, and issues an opinion in accordance with Annex 5 to these Rules. A

scanned copy and information from the conclusion, as well as photos and/or video materials, are entered by the LEB (service provider) into the SSIS within 2 (two) working days from the date of submission of the signed conclusion by the special commission.

The determination of the production capacity of the enterprise and infrastructure is carried out within 5 (five) working days free of charge on the basis of a written notification from the commodity producer to the regional Chamber of Entrepreneurs of NCE "Atameken". The review period is extended for no more than 5 (five) working days, in agreement with the commodity producer.

Verification of compliance of the production capacity of the enterprise and the infrastructure of the commodity producer by the special commission is carried out on the basis of documentation (technical and/or title) with the mandatory attachment of supporting photos and video materials once every three years, or when the criteria established by these Rules change.

The special commission annually monitors the activities of commodity producer who have received a conclusion on the compliance of production capacity and infrastructure for each type of subsidy and, in case of violations, revokes the conclusion from the commodity producer.

Appeals against the decisions of the special commission are made in court.

Chapter 4. Procedure for accepting, reviewing applications and paying subsidies

19. Applications for the relevant types of subsidies are accepted regardless of the availability of budgetary funds at the place of registration of farm animals within the time limits provided for in the criteria in accordance with Annex 2 to these Rules.

20. The application shall be generated and registered by the manufacturer in the Personal Account in the following order:

1) forms an application by entering information into it, and also scans and attaches an electronic copy of the documents specified in Appendix 3 to these Rules;

2) registers the application in SSIS by signing it with EDS of:

manufacturer;

a trustee of the inheritance appointed by a notary (in the event of the death of the manufacturer).

Footnote. Paragraph 20 - as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

21. After signing with an EDS, the application becomes available in the Personal Account of the LEB (service provider). Within 2 (two) business days from the date of receipt of the application, the LEB (service provider) shall check it for completeness of the data and attached documents specified in Appendix 3 to these Rules. If complied with, the application is subject to approval, signed with an EDS of the responsible executor of the LEB (service provider) and entered into the register of approved applications (waiting list), and the LEB (

service provider) shall send a notification of the results of consideration of the application for subsidies in the form according to Appendix 6 to these Rules.

Applications shall be reviewed and subsidies shall be paid for approved applications in order of priority according to the date and time of application registration.

Footnote. Paragraph 21 - as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

22. If there are grounds for refusal to provide subsidies, the LEB (service provider) sends to the producer a reasoned refusal to provide public service in accordance with Annex 7 to these Rules.

23. The refusal to grant subsidies is carried out on the grounds specified in paragraph 9 of the List.

24. If funds are available for the relevant area, LEB (service provider), within 2 (two) business days after approval of the application, shall generate invoices for payment of subsidies in the State Subsidy Information System (SSIS), which shall be uploaded to the Treasury-Client information system, taking into account the monthly financing plan.

For applications in which the amount of subsidies exceeds the amount of budget funds provided for in the Financing Plan for the relevant month, the payment of subsidies shall be made in the following month, in order according to the date of receipt of applications.

In the event of a return of invoices for payment due to incorrect information in the details of the current account of a second-tier bank, the LEB (service provider), based on an additional application from the manufacturer to change the details of the second-tier bank account, shall make the appropriate changes to the details of the second-tier bank for the current application in the SSIS.

Footnote. Paragraph 24 - as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

24-1. If funds are insufficient to fully satisfy the application, the LEB (service provider) shall send a proposal for partial payment of the due subsidies via the SSIS to the Personal Account of the manufacturer. The proposal shall be accepted/rejected by the manufacturer within 2 (two) business days. If the manufacturer agrees, the LEB shall make payment in accordance with the submitted proposal. The remainder of the due subsidies shall be paid upon redistribution of funds between types of subsidies and (or) allocation of budget funds in the current/next financial year(s).

If the manufacturer rejects the offer for partial payment or after 2 (two) working days, the offer shall be sent to the next manufacturer on the waiting list.

Chapter 4 has been supplemented with paragraph 24-1 in accordance with the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

24-2. In the event of a lack of funds to satisfy applications in the current financial year, approved applications for subsidies are subject to payment upon the allocation of additional

budget funds in the current financial year and (or) the redistribution of funds between types of subsidies. In the event of a lack of additional budget funds in the current financial year, for applications received on the waiting list, subsidies shall be paid in the following financial year(s).

Chapter 4 has been supplemented with paragraph 24-2 in accordance with the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

25. District departments of agriculture (hereinafter referred to as DDA) monitor the safety of subsidized livestock through the SSIS in the section "Monitoring the fulfillment of obligations".

If the DDA establishes a violation by the producer of the accepted obligation to ensure the safety of the declared livestock (except for the zootechnical standard of disposal) and its intended use within the framework of the submitted application for receiving subsidies, the DDA, within thirty working days from the date of establishing the fact(s) of violation by the producer of the accepted obligation within the framework of the submitted application for receiving subsidies, shall send the producer a notice of return of the received amount of the subsidy to the local budget, indicating the amount, the term of return, the budget classification code of the Republic of Kazakhstan, according to which the return of funds should be made, the details of the bank account to which the funds should be transferred.

Notification of the return of the received subsidy amount shall be sent by letter to the place of registration of the manufacturer, as well as to the "personal account" of the SSIS. The notification shall be considered delivered from the moment the letter is received or the notification is read in the electronic system.

In case of confirmation of the violation by the manufacturer of the accepted obligation within the submitted application for receiving subsidies, the amount of funds for each unsaved livestock unit is subject to return. The amount of the received subsidy is subject to return by the manufacturer to the local budget within ninety working days from the date of receipt of the notification.

In the event of a full or partial failure to transfer the amounts specified in the notification, the DDA shall send materials to the regional agricultural department to take measures to return the funds through legal proceedings.

Monitoring of the fulfillment of obligations, as well as activities for the return of funds in the cities of Astana, Almaty and Shymkent, shall be carried out by the LEB (service providers) of these administrative-territorial units.

In the event of a violation by the producer of the obligations stipulated in the submitted application, the producer shall have the opportunity to submit a new application only after fulfilling his previous obligations (after the return of subsidies for the unsaved livestock).

Footnote. Paragraph 25 - as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

Chapter 5.

Procedure for appealing decisions, actions (inaction) of the LEB (service provider) and (or) their officials on the provision of public services

26. Complaint against a decision, action (inaction) of the LEB (service provider) on the provision of public services is submitted to the head of the LEB (service provider), to the authorized body for the assessment and control of the quality of public services.

In case of receipt of a complaint in accordance with paragraph 4 of Article 91 of the Administrative Procedural Code of the Republic of Kazakhstan (hereinafter - the APC of RK) , the LEB (service provider) sends it to the body considering the complaint (a higher administrative body and (or) an official) no later than 3 (three) working days from the date of receipt. The complaint of the LEB (by the service provider) is not sent to the body considering the complaint (a higher administrative body and (or) an official), in case of adoption of a favorable act, commission of an administrative action that fully satisfies the requirements specified in the complaint.

27. The complaint of a commodity producer in accordance with paragraph 2 of Article 25 of the Law is subject to consideration by:

the LEB (service provider) – within 5 (five) working days from the date of its registration;
the authorized body for the assessment and control of the quality of public services – within 15 (fifteen) working days from the date of its registration.

The term for consideration of the complaint by the authorized body for the assessment and control of the quality of public services in accordance with paragraph 4 of Article 25 of the Law is extended for no more than 10 (ten) working days if it is necessary:

- 1) to conduct additional examination or verification of the complaint or on-site verification;
- 2) to get more information.

In case of extension of the period for consideration of the complaint, the official authorized to consider complaints, within 3 (three) working days from the date of extension of the period for consideration of the complaint, informs the commodity producer who filed the complaint in writing (when filing a complaint on paper) or electronically (when filing a complaint electronically) about the extension of the period for consideration of the complaint with an indication of the reasons for the extension.

Unless otherwise provided by law, an appeal to the court is allowed after a pre-trial appeal in accordance with paragraph 5 of Article 91 of the APC of RK.

Annex 1
to the Rules for subsidizing
the development of livestock
breeding, increasing productivity
and quality of livestock products

List of directions and standards of subsidies

Footnote. Appendix 1 - as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

№	Types of subsidies	Unit of measurement	Subsidy standards per 1 unit, tenge
Meat and meat- and- dairy cattle breeding			
1.	Conducting selection and breeding work:		
1.1	Commercial breeding stock of cattle	Livestock unit/Breeding season	10,000
1.2	Breeding stock of cattle		15,000
2.	Acquisition of a domestic breeding bull for meat and meat and dairy production	Acquired livestock unit	150,000
3.	Purchase of breeding stock of cattle:	Acquired livestock unit	
3.1	Domestic		150,000
3.2	Imported from the Commonwealth of Independent States, Ukraine		225,000
3.3	Imported from Australia, North and South America, Europe		300,000
4.	Reduction in the cost of male cattle (including breeding males of dairy or dairy-beef breeds) sold for fattening in feedlots or for slaughter in meat processing plants	Kilogram of live weight	200
5.	Reducing the cost of sold beef by meat processing plants engaged in slaughter and primary processing of beef	Kilogram of sold beef	175
Dairy and dairy- meat cattle breeding			
1.	Purchase of semen from a breeding bull of dairy and dairy-meat breeding:		
1.1	One-sex	Acquired dose	10,000
1.2	Two-sex		5,000
2.	Purchase of breeding stock of cattle:	Acquired livestock unit	
2.1	Domestic		200,000
2.2	Imported from the Commonwealth of		225,000

	Independent States, Ukraine		
2.3	Imported from Australia, North and South America, Europe		400,000
3.	Reducing the cost of milk production:		
3.1	Farms with forage herds of 600 cows or more	Sold or transferred kilogram to own processing plant or workshops	45
3.2	Farms with forage herds of 400 cows or more		30
3.3	Farms with forage herds of 50 cows or more		20
3.4	Agricultural production cooperative	Sold kilogram per processing plant or workshop	20
4.	Reducing the cost of purchasing cattle embryos	Item	80,000
5.	Subsidizing the cost of services of breeding centers, distribution centers for the sale of semen and embryos of breeding animals and technicians- inseminators for artificial insemination of breeding stock of cattle of producers and in agricultural cooperatives	Inseminated livestock unit this year	5,000
Meat poultry farming			
1.	Acquisition of day-old breeding young animals of parent/grandparent form	Acquired livestock unit	600
2.	Reducing the cost of chicken meat production:		
2.1	Actual production from 15,000 tons	Sold or transferred kilogram to own processing plant or workshops	80
2.2	Actual production from 10,000 tons		70
2.3	Actual production from 5,000 tons		60
2.4	Actual production from 500 tons		50
Egg poultry farming			
1.	Acquisition of day-old young animals of the final form of egg direction, obtained from breeding birds	Acquired livestock unit	60

Sheep breeding			
1.	Conducting selection and breeding work		
1.1	Breeding stock of sheep	Livestock unit/Breeding season	4,000
1.2	Commercial breeding stock of sheep		2,500
2.	Purchase of domestic breeding sheep:	Acquired livestock unit	15,000
2.1	Purchase of imported breeding mother ewes		30,000
2.2	Purchase of imported breeding rams		150,000
3.	Reducing the cost of small male cattle sold for fattening in feedlots or for slaughter in meat processing plants	Realized livestock unit	3,000
4.	Reducing the cost of purchasing sheep embryos	Item	80,000
5.	Subsidizing the cost of services of breeding centers, distribution centers for the sale of semen and embryos of breeding animals and technicians-inseminators for artificial insemination of the breeding stock of sheep of producers and in agricultural cooperatives	Inseminated livestock unit/breeding season	1,500
Horse breeding			
1.	Purchase of breeding stallions of a productive direction	Acquired livestock unit	100,000
Camel breeding			
1.	Purchase of breeding stud camels	Acquired livestock unit	100,000
Pig breeding			
1.	Purchase of breeding pigs	Acquired livestock unit	100,000
2.	Conducting selection and breeding work with breeding and commercial breeding and replacement stock of pigs	Livestock unit/once a year	40,000
At the expense of budgetary funds from the local budget, at the discretion of LEB (service provider), taking into account the characteristics and specialization of the regions			
1.	Conducting selection and breeding work with the		10,000

	breeding stock of marals (deer)	Livestock unit/Breeding season	
2.	Conducting selection and breeding work with bee colonies	Bee family/once a year	5,000
3.	Reducing the cost of feed for livestock	Livestock unit	LEB is being installed
4.	Purchase of breeding stock of goats	Acquired livestock unit	40,000
5.	Reducing the cost of production and processing of mare's milk	Kilogram	60
6.	Reducing the cost of production and processing of camel milk	Kilogram	55

Subsidies in the direction of "Reducing the cost of feed for livestock" shall be carried out only when an emergency is declared or abnormal weather conditions occur that harm the procurement of feed in the region, confirmed by the hydrometeorological service. From January 1, 2024, this requirement shall not apply to breeding stock of dairy farms located in the Atyrau, Mangistau and Kyzylorda regions.

Subsidies in the direction of "Reducing the cost of feed for livestock" shall be provided with the allocation of additional budget funds.

The purchase of semen from a breeding bull of dairy and dairy-meat breeds shall be subsidized up to 50% of the purchase price, but not more than the established standard.

The acquisition of breeding producers shall be subsidized only if the producer has breeding stock (except for breeding centers, and feedlots that lease breeding bulls to commercial herds/farms).

Appendix 2
to the Rules for subsidizing
the development of livestock breeding,
increasing the productivity
and quality of livestock products

Criteria for manufacturers applying for subsidies

Footnote. Appendix 2 - as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

№	Types of subsidies	Criteria	Method of checking in the state information system of subsidies (hereinafter referred to as SSIS) for compliance with the terms of subsidies	Application deadline
	Meat and meat and dairy cattle breeding			

1.	Conducting selection and breeding work:			
1.1		<p>1. Availability of a registration number (except for an agricultural cooperative) (valid from January 1, 2025).</p> <p>2. Availability of agricultural land (except for an agricultural cooperative formed only from private subsidiary farms).</p> <p>3. Registration of breeding stock in the IAA and IBSBW at the time of application (for agricultural cooperatives - registration in the name of the agricultural cooperative or cooperative members).</p> <p>5. Reproduction by one or more of the following methods:</p> <p>5.1. In case of free mating: 1) registration in the IAA and IBSBW of the used breeding bulls; 2) the load on one breeding bull - producer shall not be less than 20 and not more than 30 livestock units of breeding stock (inclusive); 3) breeding bulls shall meet the following requirements: be at least 12 months old as of June 1 of the current year;</p>	<p>Integration interaction with the Unified Automated Management System (hereinafter referred to as UAMS), the information system of the unified state real estate cadastre (hereinafter referred to as ISUSRC), the</p>	<p>From April 15 to December 20 (inclusive) of the current year</p>

<p>Commercial breeding stock of cattle</p>	<p>used for no more than two breeding seasons in a row; not previously used in breed transformation.</p> <p>5.2. For artificial insemination: 1) registration of breeding bulls in the IBSBW, whose semen was used; 2) registration in the IAA and IBSBW of breeding bulls used for covering, which shall meet the following requirements: be at least 12 months old as of June 1 of the current year; used for no more than two breeding seasons in a row; not previously used in selection and breeding work; the standard load per 1 bull shall not be more than 100 livestock units of breeding stock; 3) registration of the breeding/distribution center/inseminator technician in the state electronic register of permits and notifications in the field of breeding livestock; 4) confirmation in the IBSBW by the inseminator technician/breeding/distribution center of the fact of artificial insemination and the fact of pregnancy of the breeding stock.</p>	<p>database for the identification of agricultural animals (hereinafter referred to as IAA) and the information base of selection and breeding work (hereinafter referred to as IBSBW)</p>

		distribution center of the fact of artificial insemination and the fact of pregnancy of the breeding stock.		
2.	Purchase of a breeding bull for beef and beef and dairy production	<p>1. Availability of a registration number (except for an agricultural cooperative) (valid from January 1, 2025).</p> <p>2. Availability of agricultural land (except for an agricultural cooperative formed only from private subsidiary farms).</p> <p>3. Registration of breeding stock in the IAA and IBSBW at the time of application (for agricultural cooperatives - registration of breeding stock in the IAA and IBSBW in the name of the agricultural cooperative or cooperative members).</p> <p>4. Registration of the purchased livestock in the IAA and IBSBW at the time of application.</p> <p>5. Age of the purchased livestock (at the time of the sale date, specified in the breeding certificate) - within 8 to 26 months inclusive.</p> <p>6. The number of purchased breeding bulls shall be in the following ratios to the breeding stock: 1) for free mating - no less than 20 breeding queens and no more than 30</p>	Integration interaction with UAMS, ISUSRC, IAA and IBSBW	From January 20 to December 20 (inclusive) of the current year (application shall be submitted within

		<p>breeding queens per 1 bull; 2) for covering during artificial insemination - 1 bull per 100 breeding queens.</p> <p>7. Acceptance of the obligation for the intended use of no more than two breeding seasons in a row (no less than 18 months).</p>		<p>twelve months from the date of purchase)</p>
3.	Purchase of breeding stock of cattle	<p>1. Availability of a registration number (valid from January 1, 2025). 2. Availability of agricultural land. 3. Availability of registration of the acquired livestock in the IBSBW and IAA at the time of application. 4. Age of the acquired livestock (if acquired domestically - at the time of sale specified in the breeding certificate; if imported - at the time of placing the cattle in quarantine with the seller (exporter)): heifers - within 6-18 months inclusive; heifers - 13-26 months inclusive. 5. Acceptance of an obligation to use it for its intended purpose for at least two years, except for natural loss (mortality) rates.</p>	<p>Integration interaction with UAMS, ISUSRC, IAA and IBSBW</p>	<p>From January 20 to December 20 (inclusive) of the current year (application shall be submitted within twelve months from the date of purchase)</p>
		<p>1. Availability of a registration number (except for an agricultural cooperative) (valid from January 1, 2025).</p>		

4.	Reduction in the cost of male cattle (including male dairy or dairy-beef cattle) sold for fattening in feedlots or for slaughter in meat processing plants	<p>2. Availability of agricultural land (except for an agricultural cooperative formed only from private subsidiary farms).</p> <p>3. Availability of registration of the breeding stock of cattle, as well as their male offspring born on this farm in the IAA and IBSBW (historical information) at the time of applying.</p> <p>4. Sale of male cattle to a feedlot for fattening cattle or to meat processing plants with a slaughter capacity of at least 50 livestock units of cattle per day, having a registration number and a positive conclusion of a special commission in the form according to Appendix 5 to these Rules.</p> <p>5. Availability of registration in the IAA and IBSBW (historical information) of the sold male cattle in the name of the feedlot;</p> <p>5.1. when selling livestock to a meat processing plant – availability of information in the UAMS (historical information) about the sold livestock.</p>	Integration interaction with UAMS, ISUSRC, IBSBW and IAA	From January 20 to December 20 (inclusive) of the current year (application shall be submitted within six months from the date of implementation)
5.	Reducing the cost of sold beef by meat processing plants engaged in slaughter	<p>1. Availability of an accounting number.</p> <p>2. Availability of a positive conclusion from a special commission on a meat processing plant engaged in the</p>		From January 20 to December 20 (inclusive) of the current year (the application shall be submitted within six

	and primary processing of beef	slaughter and primary processing of cattle meat in the form according to Appendix 5 to these Rules.	Integration interaction with UAMS	months from the date of receipt of payment for the products sold)
Dairy and dairy-beef cattle breeding				
1.	Purchase of semen of a breeding bull of dairy and dairy-meat directions	1. Availability of a registration number (valid from January 1, 2025).	Integration interaction with UAMS, ISUSRC, IAA and IBSBW	From January 20 to December 20 (inclusive) of the current year (application shall be submitted within twelve months from the date of purchase)
1.1	One-sex	2. Availability of agricultural land (except for agricultural cooperatives formed only from private subsidiary farms). 3. Availability of registration of breeding stock in the IAA and IBSBW at the time of application.		
1.2	Two-sex	4. Availability of registration in the IBSBW of breeding bulls of dairy and dairy-beef directions, whose semen was purchased. 5. The purchase rate shall be calculated at two doses per livestock unit of breeding stock .		
		1. Availability of a registration number (valid from January 1, 2025). 2. Availability of agricultural land (except for an agricultural cooperative formed only from private subsidiary farms). 3. Availability of registration of the acquired livestock in the IBSBW and IAA at the time of application. 4. Age of		From January 20 to December 20 (

2.	Purchase of breeding stock of cattle	<p>the acquired livestock (if acquired domestically - at the time of sale specified in the breeding certificate; if imported - at the time of placing the cattle in quarantine with the seller (exporter)):</p> <p>heifers - within 6 to 18 months inclusive; heifers - 13 to 26 months inclusive.</p> <p>5. Acceptance of an obligation to use it for its intended purpose for at least two years, except for natural loss (mortality) rates.</p>	Integration interaction with UAMS, ISUSRC, IAA and IBSBW	inclusive) of the current year (application shall be submitted within twelve months from the date of purchase)
3.	Reducing the cost of milk production	<ol style="list-style-type: none"> 1. Availability of an accounting number. 2. Availability of agricultural land. 3. Availability of registration in the IAA of at least 50 livestock units of forage breeding stock aged 23 months for breeding animals and 28 months for commercial animals. 4. Sale of milk to a milk processing plant or milk processing shop with an accounting number. 5. Availability in the IBSBW of the results of a monthly study of milk samples from each dairy cow to determine somatic cells, conducted in accredited laboratories. 6. Availability of a positive conclusion from a special commission on a commercial dairy farm in the form 	Integration interaction with UAMS, ISUSRC, IAA and IBSBW	From January 20 to December 20 (inclusive) of the current year (the application shall be submitted within six months from the date

		according to Appendix 5 to these Rules.		of receipt of payment for the products sold)
3.1.	Agricultural production cooperative (hereinafter referred to as APC)	<p>1. Availability of an accounting number (for your milk collection point).</p> <p>2. Availability of registration of the breeding stock of cattle aged 28 months and older of the cooperative members in the ILS at the time of application.</p> <p>3. Availability of a positive conclusion of a special commission in the form according to Appendix 5 to these Rules.</p> <p>4. Sale of prepared milk to a milk processing plant that has an accounting number.</p> <p>5. Availability in the IBSBW of the results of a monthly study of milk samples from each dairy cow to determine somatic cells, carried out in accredited laboratories (for members of the APC that are commodity producers (peasant farm, farm, individual entrepreneur).</p>	Integration interaction with UAMS, IAA and IBSBW	From January 20 to December 20 (inclusive) of the current year (the application shall be submitted within six months from the date of receipt of payment for the products sold)
4.		<p>1. Availability of a registration number (valid from January 1, 2025).</p> <p>2. Availability of agricultural land (except for an agricultural cooperative formed only from private subsidiary farms).</p> <p>3.</p>	Integration interaction with	From January 20 to December 20 (inclusive) of the current year (application shall be

	Reducing the cost of purchasing cattle embryos	Availability of registration of the breeding stock in the IAA at the time of application. 4. Availability of registration of the acquired embryo in the IBSBW.	UAMS, ISUSRC, IAA and IBSBW	submitted within twelve months from the date of purchase)
5.	Subsidizing the cost of services of breeding, distribution centers and insemination technicians for artificial insemination of breeding stock of cattle of producers and in agricultural cooperatives	<p>1. Registration of the breeding/distribution center/insemination technician in the state electronic register of permits and notifications in the field of breeding livestock.</p> <p>2. The producer – owner of the animals has the registration of the breeding stock in the IAA and IBSBW at the time of applying. 3. For agricultural cooperatives – registration of the breeding stock in the IAA and IBSBW in the name of the agricultural cooperative or associated members of the cooperative at the time of applying. 4. Registration in the IBSBW of breeding bulls-producers, whose semen was used for artificial insemination. 5. Availability of an agreement on artificial insemination of the breeding stock with the producer – recipient of the service.</p> <p>6. Confirmation in the IBSBW by the insemination technician/breeding/distribution center of</p>	Integration interaction with the IAA and the IBSBW	From January 20 to December 20 (

		the fact of artificial insemination and the fact of pregnancy of the breeding stock.		inclusive) of the current year
Meat poultry farming				
1.	Acquisition of day-old breeding young animals of parent/grandparent form	1. Availability of an accounting number. 2. Availability of registration of the purchased day-old breeding young animals in the IBSBW at the time of application.	Integration interaction with UAMS and IBSBW	From January 20 to December 20 (inclusive) of the current year (application shall be submitted within twelve months from the date of purchase)
2.	Reducing the cost of chicken meat production	1. Availability of an accounting number. 2. Availability of a positive conclusion of a special commission on the poultry farm in the form according to Appendix 5 to these Rules.	Integration interaction with UAMS	From January 20 to December 20 (inclusive) of the current year (the application shall be submitted within six months from the date of receipt of payment for the products sold)
Egg poultry farming				
1.	Acquisition of day-old young animals of the final form of egg direction, obtained from breeding birds	1. Availability of an account number. 2. Availability of registration of the acquired day-old young animals of the final form of egg-laying direction, obtained from breeding birds in the IBSBW at the time of application. 3. Availability of a breeding certificate for the parent flock from which the day-old young animals of the final form were obtained.	Integration interaction with UAMS and IBSBW	From January 20 to December 20 (inclusive) of the current year (application shall be submitted within twelve months from the date of purchase)
Sheep breeding				
1.	Conducting selection and breeding work:			
		1. Availability of a registration number (valid from January 1, 2025).		

1.1	Breeding stock of sheep	<p>2. Availability of agricultural land (except for an agricultural cooperative formed only from private subsidiary farms).</p> <p>3. Availability of registration of breeding stock in the IAA and IBSBW at the time of application.</p> <p>4. Reproduction by one or more of the following methods:</p> <p>4.1. In case of artificial insemination :</p> <p>1) registration of breeding rams in the IBSBW, whose semen was used (when using deep-frozen semen);</p> <p>2) registration of the main breeding rams in the IAA and IBSBW (when using freshly pumped semen);</p> <p>3) registration of breeding trial rams in the IAA and IBSBW;</p> <p>4) standard load per 1 breeding main sire ram 1:300, breeding trial ram - 1:100; 5) standard load per 1 breeding sire ram (trial ram) used for covering - 1:100;</p> <p>6) the age of breeding sire rams (trial rams) used for covering shall be at least 12 months as of October 1 of the current year inclusive;</p> <p>7) registration of the breeding/distribution center/insemination technician in the state electronic register of</p>	<p>From August 1 to December 20 (inclusive) of the current year</p> <p>Integration interaction with</p>

Availability of registration of at least 30 livestock units of breeding stock over 3 years old in the IAA at the time of application. 4. Sale of</p>	<p>Integration interaction with UAMS, ISUSRC, IAA</p>	<p>From January 20 to December 20 (inclusive) of the current year (the application shall be submitted within six</p>

		milk to a milk processing plant or milk processing workshop that has an accounting number. 5 . The annual volume of mare's milk production per 1 livestock unit of dairy mare shall not exceed 750 kilograms.		months from the date of receipt of payment for the products sold)
5.	Reducing the cost of production and processing of camel milk	<p>1. Availability of an accounting number (valid from January 1, 2025).</p> <p>2. Availability of agricultural land (except for an agricultural cooperative formed only from private subsidiary farms).</p> <p>3. Availability of registration of at least 30 livestock units of breeding stock over 3 years old in the IAA at the time of application.</p> <p>4. Sale of milk to a milk processing plant or milk processing workshop that has an accounting number. 5 . The annual production volume of camel milk per 1 livestock unit of dairy camel shall not exceed 1,500 kilograms.</p>	Integration interaction with UAMS, ISUSRC, IAA	From January 20 to December 20 (inclusive) of the current year (the application shall be submitted within six months from the date of receipt of payment for the products sold)

When purchasing breeding stock of animals and poultry, it is necessary to ensure the safety of:

1) breeding stock in the IAA and IBSBW (except for the norms of natural loss (mortality)) within 2 (two) years from the date of application;

2) manufacturers in the IAA and IBSBW for at least 18 (eighteen) months from the date of application;

3) parent flock of poultry in the IBSBW within 60 (sixty) weeks from the date of application.

The moment of acquisition of livestock shall be calculated from the date of registration of the animal in the IAA in the name of the buyer, for birds, semen and embryos - from the date of registration in the name of the buyer in the IBSBW.

Revocation, cancellation and adjustment of electronic invoices used to receive subsidies shall be prohibited.

If the manufacturer does not receive subsidies using specific electronic invoices, at the request of the manufacturer, LEB (service provider) shall unblock the electronic invoices within 5 (five) working days through SSIS.

The authorized body shall develop the technical specifications for the SSIS operation algorithm and post it in the SSIS.

The following shall not be eligible for subsidies:

1) the acquisition of animals, breeding products (material), previously subsidized to reduce the cost upon acquisition, acquired by barter as mutual settlements or used for purposes other than reproduction;

2) selection and breeding work with breeding stock of cattle, sheep, pigs, marals and bee colonies, subsidized in the current year for selection and breeding work for the current breeding season;

3) livestock products and male cattle/small ruminants purchased by producers from other individuals and legal entities for their subsequent resale and/or processing (except for a meat processing plant with a capacity of 1,500 livestock units of cattle per day);

4) by-products of poultry farming – legs, heads, internal organs;

5) milk sold to a milk processing plant that is not located in the Republic of Kazakhstan;

6) producers of goods who have discrepancies in data (animal identification number, sex, breed, date of birth) on the number of animals registered in the IBSBW and the IAA, in accordance with the criteria for producers of goods applying for subsidies specified in Appendix 2 to the Rules);

7) breeding and distribution centers, insemination technicians for services rendered in the current year for artificial insemination of breeding stock of sheep, subsidized for conducting selection and breeding work in the breeding season of the current year;

8) producers-applicants (declared breeding stock) for receiving subsidies for selection and breeding work, who were provided with subsidized services for artificial insemination of cattle and sheep by breeding and distribution centers, insemination technicians in the breeding season of the current year;

9) forage subsidized in the current year.

Appendix 3
to the Rules for subsidizing
the development of livestock breeding,
increasing the productivity
and quality of livestock products

No	Age and gender group	AIN in IAA (not required for birds)	n in the IAA in the name of the buyer (not required for birds)	Registration number in IBSBW	Date of registration in the IBSBW in the name of the buyer	Direction of productivity	date of purchase, if imported on the date of quarantine)	Maximum subsidy standard, tenge	Amount of subsidies, tenge.
1	2	3	4	5	6	7	8	9	10
1.									
2.									

9. Electronic copy of the seller's quarantine certificate (upon import) (not required for day-old chickens).

10. Electronic copy of the purchase and sale agreement.

11. An electronic copy of the breeding certificate for the parent stock from which the final day-old young animals were obtained (for egg poultry farming).

12. Electronic invoice (not required for import):

No	Date of issue of electronic invoice	Date of the transaction	EI number	IIN/BIN of the seller	Name of the seller	Total cost
1	2	3	4	5	6	7
1.						

13. An electronic copy of the document confirming full payment of the cost (for purchases within the country: payment order/bank statement/cash register receipts/cash receipt order;

when purchasing abroad: customs declaration for goods/statement(s) on import of goods and payment of indirect taxes and statement on transfer of funds).

14. The total amount of the subsidy due - _____ tenge.

I hereby confirm that I will ensure the safety of the declared number of animals and poultry:

1) breeding stock in the IAA and IBSBW (except for the norms of natural loss (mortality)) within 2 (two) years from the date of application;

2) manufacturers in the IAA and IBSBW for at least 18 (eighteen) months from the date of application;

3) parent flock of poultry in the IBSBW within 60 (sixty) weeks from the date of application.

In case of failure to ensure safety, I agree to return the received subsidies for the unsaved livestock and poultry.

I am aware of the blocking of electronic invoices used to receive subsidies.

I hereby confirm the accuracy of the data provided, I am aware of the responsibility for the submission of false information and documents in accordance with the legislation of the

Republic of Kazakhstan and I agree to the use of information constituting a secret protected by law, as well as the collection and processing of personal data.

Form 2

Local executive body

(region, city

of republican significance and capital)

Application for subsidies for breeding centers and distribution centers for the sale of semen and embryos

of breeding animals (hereinafter referred to as the distribution center), insemination technicians for services

in artificial insemination of breeding stock of cattle/sheep of producers and in agricultural cooperatives (leave as appropriate)

Number of the application: _____

Date of application formation: _____

1. Name of the breeding/distribution center/insemination technician providing artificial insemination services:

2. BIN (IIN) _____

3. Legal address: _____

(region, district, city/village/street, house number)

4. Bank details (IIC, KBE, BIC): _____

5. Telephone number of the breeding/distribution center/insemination technician

6. Name of the producer/agricultural cooperative receiving artificial insemination services

:

7. BIN (IIN) of the producer/agricultural cooperative _____

8. Legal address of the producer/agricultural cooperative: _____

(region, district, city/village/street, house number)

9. Accounting number of the producer/agricultural cooperative receiving services

10. Telephone number of the producer/agricultural cooperative

11. Availability of a breeding/distribution center/insemination technician
in the state electronic register of permits and notifications in the field of livestock
breeding

(select from the list)

12. List of inseminated breeding stock:

№	Name of the manufacturer/ Last name, first name, patronymic (if any) of individuals and name of agricultural entities (peasant farm/farm) that are members of the cooperative	IIN (BIN)	AIN of breeding stock of cattle registered in the IAA	Date of insemination	Date of examination (not required for sheep)
1	2	3	4	5	6
1.					
2.					

Information about members of an agricultural cooperative who own livestock shall be filled in from a certificate of state registration of a legal entity from the "electronic government" web portal/membership book/decision of the general meeting of the cooperative (minutes)/agreement with an associate member of the cooperative, which is attached to the application.

13. An electronic copy of the agreement for the provision of artificial insemination services.

14. Electronic copy of the membership book of the cooperative members.

15. Total amount of services rendered _____ tenge.

16. The amount of services per livestock unit is _____ tenge.

17. Subsidy standard: per livestock unit _____ tenge.

18. The total amount of the subsidy due is _____ tenge.

I hereby confirm the accuracy of the data provided, I am aware of the responsibility for the submission of false information and documents in accordance with the legislation of the Republic of Kazakhstan and I agree to the use of information constituting a secret protected by law, as well as the collection and processing of personal data.

(select from the list)

When reproducing by manual mating:

1) Information on the breeding stock of sheep covered by selection and breeding work:

№	AIN registered in the IAA	Registration numbers of breeding stock registered in the IBSBW	BIN/IIN of the owner of the animal - a member of the agricultural cooperative (for an agricultural cooperative)	Surname, first name, patronymic (if any) of a member of an agricultural cooperative (for an agricultural cooperative)
1	2	3	4	5
1.				

Total _____ livestock units

2) Information about the breeding rams used for manual mating:

№	AIN of stud rams registered in the IAA	Registration numbers of stud rams in IBSBW	Used in the household (indicate years)
1	2	3	4
1.			
2.			

3) Load per 1 stud ram _____ livestock units of ewes

8. The subsidy standard is 4 thousand tenge per livestock unit.

9. The total amount of the subsidy due is _____ tenge.

Information about members of an agricultural cooperative who own livestock shall be filled in from a certificate of state registration of a legal entity from the "electronic

government" web portal/membership book/decision of the general meeting of the cooperative (minutes)/agreement with an associate member of the cooperative, which is attached to the application.

I hereby confirm that I will ensure the safety of the declared breeding stock (except for the zootechnical standard of disposal) for one year; in the event of failure to ensure safety, I agree to return the received subsidies for the unsaved livestock of agricultural animals.

I hereby confirm the accuracy of the data provided, I am aware of the responsibility for the submission of false information and documents in accordance with the legislation of the Republic of Kazakhstan and I agree to the use of information constituting a secret protected by law, as well as the collection and processing of personal data.

Signed and sent by the applicant at (time) on "___" _____ 20__

Information about the applicant from the digital signature.

Explanation of abbreviations:

IIN – individual identification number;

BIN – business identification number;

IIC – individual identification code;

KBE – beneficiary code;

BIC – bank identification code;

IAA – database for identification of agricultural animals;

IBSBW – information base of selection and breeding work;

AIN – animal identification number;

EDS – electronic digital signature.

Form 6

Local executive body

(region, city

of republican significance and capital)

Application for subsidies for selection and breeding work with commercial breeding stock of sheep

Number of the application: _____

Date of application formation: _____

1. Name of the manufacturer _____

(last name, first name, patronymic (if any) of an individual/name of a legal entity)

2. Manufacturer's address: _____

(region, district, city/village/street, house number);

3. IIN/BIN _____

4. Bank details (IIC, KBE, BIC):

5. Farm registration number: _____

6. Information on agricultural land plots

No	Cadastral number	Total area, hectares	Land category	Intended purpose
1	2	3	4	5
1.				
2.				

7. Manufacturer's phone number _____

When performing artificial insemination on their own:

1) Information on the commercial breeding stock of sheep covered by selection and breeding work:

No	AIN registered in the IAA	Date of insemination	BIN/IIN of the owner of the animal - a member of the agricultural cooperative (for an agricultural cooperative)	Surname, first name, patronymic (if any) of a member of an agricultural cooperative (for an agricultural cooperative)
1	2	3	4	5
1.				

Total _____ livestock units

2) Information about the breeding rams whose semen was used for artificial insemination (when using deep-frozen semen):

No	Registration number of the breeding ram in the IBSBW
1	2
1.	
2.	

3) Number of doses used _____

4) Information about the main breeding rams used for artificial insemination (when using freshly extracted semen):

No	AIN of the main stud rams registered in the IAA	Registration numbers of the main stud rams in the IBSBW	Used in the household (indicate years)
1	2	3	4
1.			
2.			

5) Load per 1 main stud ram _____ ewes

6) Information about the breeding test rams used:

No	AIN of trial rams registered in the IAA	Registration numbers of test rams in IBSBW	Used in the household (indicate years)
1	2	3	4

1.			
2.			

7) Load per 1 test ram ____ ewes

8) Information about the breeding rams used for covering:

№	AIN of stud rams registered in the IAA	Registration numbers of stud rams in IBSBW	Used in the household (indicate years)
1	2	3	4
1.			
2.			

9) The load per 1 stud ram is ____ ewes.

10) Availability of an inseminator technician in the state electronic register of permits and notifications in the field of livestock breeding

(select from the list)

When reproducing by artificial insemination using the services of a breeding/distribution center/artificial insemination technician:

1) Information on the commercial breeding stock of sheep covered by selection and breeding work:

№	AIN registered in the IAA	Date of insemination	BIN/IIN of the owner of the animal - a member of the agricultural cooperative (for an agricultural cooperative)	Surname, first name, patronymic (if any) of a member of an agricultural cooperative (for an agricultural cooperative)
1	2	3	4	5
1.				

Total _____ livestock units

2) Information about the breeding rams whose semen was used for artificial insemination (when using deep-frozen semen):

№	Registration number of the breeding ram in the IBSBW
1	2
1.	
2.	

3) Number of doses used _____

4) Information about the main breeding rams used for artificial insemination (when using freshly extracted semen):

№	AIN of the main stud rams registered in the IAA	Registration numbers of the main stud rams in the IBSBW	Used in the household (indicate years)
1	2	3	4

1.			
2.			

5) Load per 1 main stud ram ____ ewes

6) Information about the breeding test rams used:

№	AIN of trial rams registered in the IAA	Registration numbers of test rams in IBSBW	Used in the household (indicate years)
1	2	3	4
1.			
2.			

7) Load per 1 test ram ____ ewes

8) Information about the breeding rams used for covering:

№	AIN of stud rams registered in the IAA	Registration numbers of stud rams in IBSBW	Used in the household (indicate years)
1	2	3	4
1.			
2.			

9) Load per 1 stud ram ____ ewes

10) Availability of a breeding/distribution center/insemination technician in the state electronic register of permits and notifications in the field of livestock breeding

(select from the list)

When reproducing by free mating:

1) Information on the commercial breeding stock of sheep covered by selection and breeding work:

№	AIN registered in the IAA	BIN/IIN of the owner of the animal - a member of the agricultural cooperative (for an agricultural cooperative)	Surname, first name, patronymic (if any) of a member of an agricultural cooperative (for an agricultural cooperative)
1	2	3	4
1.			

Total _____ livestock units

2) Information about the breeding rams used for free mating:

№	AIN of stud rams in the IAA	Registration numbers of stud rams in IBSBW	Used in the household (indicate years)
1	2	3	4
1.			
2.			

3) Load per 1 stud ram ____ livestock units of ewes

8. The subsidy standard is 2.5 thousand tenge per livestock unit.

9. The total amount of the subsidy due is _____ tenge.

Information about members of an agricultural cooperative who own livestock shall be filled in from a certificate of state registration of a legal entity from the "electronic government" web portal/membership book/decision of the general meeting of the cooperative (minutes)/agreement with an associate member of the cooperative, which is attached to the application.

I hereby confirm that I will ensure the safety of the declared breeding stock (except for the zootechnical standard of disposal) for one year; in the event of failure to ensure safety, I agree to return the received subsidies for the unsaved livestock of agricultural animals.

Application for subsidies for selection and breeding work with breeding and commercial breeding and replacement pig stock

Number of the application: _____

Date of application formation: _____

1. Name of the manufacturer _____

(last name, first name, patronymic (if any) of an individual/name of a legal entity)

2. Manufacturer's address: _____

(region, district, city/village/street, house number)

3. IIN/BIN _____

4. Bank details (IIC, KBE, BIC):

5. Farm registration number: _____

6. Manufacturer's phone number _____

7. Reproduction by one of the following methods:

7.1. When performing artificial insemination on their own:

1) Information on the breeding stock of pigs covered by selection and breeding work:

No	AIN of breeding stock registered in the IAA	Registration numbers of breeding stock registered in the IBSBW	Date of insemination
1	2	3	4
1.			
2.			

Total _____ livestock units

2) Information about the breeding boars whose semen was used for artificial insemination (when using deep-frozen semen):

No	Registration number of the breeding boar in the IBSBW
1	2
1.	
2.	

3) Number of doses used _____

4) Information about the breeding boars used for artificial insemination (when using freshly extracted semen):

No	AIN of breeding boars registered in the IAA	Registration numbers of breeding boars in the IBSBW	Used in the household (indicate year)
1	2	3	4

Appendix 4
 to the Rules for subsidizing
 the development of livestock breeding,
 increasing the productivity
 and quality of livestock products

List of basic requirements for the provision of the public service

"Subsidies for the development of livestock breeding, increasing the productivity and quality of livestock products"

Footnote. Appendix 4 - as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

1.	Name of the service provider	Local executive bodies of regions, the cities of Astana, Almaty and Shymkent (hereinafter referred to as the Service provider).
2.	Methods of providing public services	Applications shall be accepted and the results of the provision of public services shall be issued through the web portal of the "electronic government" www.egov.kz (hereinafter referred to as the Portal).
3.	Timeframe for the provision of public service	2 (two) working days.
4.	Form of provision of public service	Electronic (partially automated).
5.	Result of rendering public service	Notification of the results of consideration of the application for subsidies, or a reasoned refusal to provide a public service. The result of the provision of the public service shall be sent to the "personal account" in the form of an electronic document certified by the electronic digital signature of the authorized person of the service provider.
6.	The amount of payment collected from the manufacturer when providing a public service and the methods of collecting it in cases stipulated by the legislation of the Republic of Kazakhstan	Free of charge.
		1) the portal - around the clock, except for technical breaks related to repair work (if the manufacturer applies after working hours, on weekends and holidays, in accordance with the labor legislation

7.	Working hours of the service provider and information objects	<p>of the Republic of Kazakhstan, applications shall be accepted and the results of the public service shall be issued on the next working day);</p> <p>2) the service provider - from Monday through Friday inclusive from 9.00 a.m. to 5.00 p.m. with a lunch break from 1.00 p.m. to 2.30 p.m., except for weekends and holidays in accordance with the labor legislation of the Republic of Kazakhstan.</p> <p>The addresses of service providers are posted on:</p> <p>1) the Internet resource of the Ministry of Agriculture of the Republic of Kazakhstan - www.gov.kz;</p> <p>2) on the Internet resource of the relevant service provider;</p> <p>3) on the portal in the state information system of subsidies.</p>
		<p>The service recipient shall submit an electronic application signed by the service recipient's electronic digital signature to receive subsidies:</p> <p>1. for the purchase of breeding parent stock of cattle (dairy, dairy and meat, meat and dairy directions), breeding stud bulls (meat and meat and dairy directions), breeding sheep, breeding stud rams, breeding stud stallions of productive direction, breeding stud camels, breeding stud boars, breeding sows, breeding parent stock of goats, breeding day-old young animals of parent/grandparent form of meat direction of birds and day-old young animals of final form of egg direction, obtained from breeding birds according to Form 1 in accordance with Appendix 3 to the Rules for subsidizing the development of breeding livestock, increasing the productivity and quality of livestock products, approved by the order of the Minister of Agriculture of the Republic of Kazakhstan dated March 15, 2019 № 108 (registered in the State Register of Normative Legal Acts under № 18404) (hereinafter referred to as the Rules):</p>

- 1) an electronic copy of the quarantine act;
 - 2) an electronic copy of the purchase and sale agreement;
 - 3) an electronic copy of the document confirming full payment of the cost (for purchases within the country: payment order/bank statement/cash register receipts/cash receipt order; for purchases abroad: customs declaration for goods/application(s) for import of goods and payment of indirect taxes and application for transfer of funds);
2. breeding and distribution centers for the sale of semen and embryos of breeding animals, insemination technicians for services on artificial insemination of breeding stock of cattle/sheep of producers and in agricultural cooperatives according to Form 2 in accordance with Appendix 3 to the Rules:
- 1) an electronic copy of the contract for the provision of artificial insemination services;
 - 2) an electronic copy of the membership book of the cooperative members;
3. for conducting selection and breeding work with a commercial breeding stock of cattle according to Form 3 in accordance with Appendix 3 to the Rules/for conducting selection and breeding work with a breeding stock of cattle according to Form 4 in accordance with Appendix 3 to the Rules/for conducting selection and breeding work with breeding stock of sheep according to Form 5 in accordance with Appendix 3 to the Rules/for conducting selection and breeding work with a commercial breeding stock of sheep according to Form 6 in accordance with Appendix 3 to the Rules/for conducting selection and breeding work with a commercial breeding stock of sheep according to Form 6 in accordance with Appendix 3 to the Rules/for conducting selection and breeding work with breeding and commercial breeding and replacement breeding stock of pigs

8.

List of documents and information requested from the service recipient for the provision of public services

according to Form 7 in accordance with Appendix 3 to the Rules;

4. for selection and breeding work with the breeding stock of marals (deer) according to Form 8 in accordance with Appendix 3 to the Rules;

5. for selection and breeding work with bee colonies according to Form 9 in accordance with Appendix 3 to the Rules: 1) an electronic copy of the selection and breeding work plan approved by the specialized research organization;

6. for purchased one-sex and two-sex semen of a breeding bull of dairy and dairy and beef direction according to Form 10 in accordance with Appendix 3 to the Rules:

1) an electronic copy of the purchase and sale agreement;

2) an electronic copy of documents confirming payment for the cost of the semen (payment order/bank statement);

7. to reduce the cost of purchasing cattle and sheep embryos in accordance with Form 11 in accordance with Appendix 3 to the Rules: 1) an electronic copy of documents confirming payment for the cost of embryos (payment order/bank statement);

2) an electronic copy of the sale and purchase agreement;

8. to reduce the cost of producing chicken meat in accordance with Form 12 in accordance with Appendix 3 to the Rules:

1) an electronic copy of documents confirming the fact of receipt of funds to the bank account: payment order/bank statement/cash register receipts/cash receipt order (not provided in the case of transferring products to own processing plants or workshops);

2) an electronic copy of the register of consignment notes for the movement of products (attached in the case of transferring products to own processing plants or workshops)

;

9. to reduce the cost of milk production (cow, mare, camel) in accordance with Form 13 in accordance with Appendix 3 to the Rules:

1) an electronic copy of the documents confirming the receipt of funds to the current account: payment order/bank statement/cash register receipts/cash receipt order (not provided in the case of transferring products to own processing plants or workshops);

2) an electronic copy of the register of consignment notes for the movement of products (attached in the case of transferring products to own processing plants or workshops);

10. to receive subsidies to reduce the cost of milk production by agricultural production cooperatives in accordance with Form 14 in accordance with Appendix 3 to the Rules:

1) an electronic copy of the documents confirming the receipt of funds to the current account (payment order/bank statement/cash register receipts/cash receipt order);

11. to receive subsidies to reduce the cost of sold beef by meat processing enterprises engaged in slaughter and primary processing of beef in accordance with Form 15 in accordance with Appendix 3 to the Rules:

1) an electronic copy of documents confirming the fact of receipt of funds to the bank account (payment order/bank statement/cash register receipts/cash receipt order);

12. to reduce the cost of male cattle sold for fattening in feedlots or for slaughter in meat processing plants according to Form 16 in accordance with Appendix 3 to the Rules/to reduce the cost of male small cattle sold for fattening in feedlots or for slaughter in meat processing plants according to Form 17 in accordance with Appendix 3 to the Rules:

1) an electronic copy of the sale and purchase agreement;

Conclusion of a special commission on the compliance of the production capacity and infrastructure of an enterprise applying for subsidies

Footnote. Appendix 5 - as amended by the order of the Minister of Agriculture of the Republic of Kazakhstan dated 25.06.2024 № 217 (shall come into effect on 01.07.2024).

" ___ " _____ 20__

1. Name of the manufacturer _____

(last name, first name, patronymic (if any) of an individual/name of a legal entity)

2. Manufacturer's address: _____

3. Farm registration number: _____

4. The code of the types of activities of the farm in accordance with the Rules for assigning accounting numbers to production facilities engaged in the raising of animals, procurement (slaughter), storage, processing and sale of animals, products and raw materials of animal origin, as well as organizations for the production, storage and sale of veterinary drugs, feed and feed additives, approved by order of the Minister of Agriculture of the Republic of Kazakhstan dated January 23, 2015 № 7-1/37 (registered in the State Register of Normative Legal Acts under № 10466):

5. Type of subsidies, indicating capacity _____

Based on the results of the inspection and verification of the farm's data, a special commission makes a decision:

Enterprise infrastructure	Corresponds	Does not match
<p>Feedlots: a specialized area for fattening cattle with a minimum capacity of 500 livestock units of male cattle at a time (the capacity shall be determined based on 30 centimeters of feed table per livestock unit), which shall have: a quarantine area; an entrance disinfection barrier; pens for keeping animals; wind protection (not required for southern regions); a hard surface in front of feeders and drinkers; concrete/iron feeders or feed tables; an autonomous source and system of water supply; automatic drinkers with heating (not required for southern regions); manure storage; feed preparation and feed distribution machinery/equipment (grain crusher/flattener or feed mill, feed distributors); feed storage; veterinary station, split and retainer with electronic scales for cattle; a reader of electronic identification methods; a ramp for unloading and loading animals; availability of the required volume of feed and adherence to the diet for grain fattening of male cattle.</p>		
<p>Fattening areas: a specialized area for fattening small cattle, with a minimum capacity of 1,000 livestock units of male small cattle at a time (the capacity shall be determined based on 10 centimetres of feed table per livestock unit), which shall have: a quarantine area; an entrance disinfection barrier; pens for keeping animals; wind protection (not necessary for southern regions); a hard surface in front of feeders and drinkers; concrete/iron feeders or feed tables; an autonomous source and system of water supply; automatic drinkers with heating (not necessary for southern regions); feed preparation and feed distribution machinery/equipment (grain crusher/flattener or feed mill, feed distributors); feed storage; veterinary</p>		

<p>station, split and locker with electronic scales for small cattle; a ramp for unloading and loading animals; availability of the required volume of feed.</p>		
<p>Meat processing plant with a slaughter capacity of at least 50 livestock units of cattle per day/at least 300 livestock units of small cattle per day (capacity shall be determined according to technical documentation): an enterprise with an automated technological line for slaughtering cattle, refrigerated chambers for storing meat, refrigerated chambers for storing finished products, infrastructure and equipment for life support systems, and a laboratory for veterinary and sanitary examination.</p>		
<p>A meat processing plant engaged in the slaughter and primary processing of beef, having:</p> <ol style="list-style-type: none"> 1) its equipment for the slaughter and deboning of cattle with a design capacity of at least 1,500 livestock units per day (capacity shall be determined according to technical documentation); 2) its system for the disposal of waste from the slaughter of cattle; 3) compliance with international quality standards (confirmed by an international audit, the relevant certificate). 		
<p>A farm with a forage-fed herd of 600 cows (capacity shall be determined according to technical documentation and/or the actual availability of forage-fed cows): a commercial dairy farm that has been put into operation or has undergone modernization with the appropriate infrastructure, having:</p> <ol style="list-style-type: none"> 1) a room for loose housing of cows; 2) a milking parlor with an automated milking unit (carousel, herringbone, parallel, tandem, robotic machine); 3) feed distribution and watering; 4) a feed shop; 5) a veterinary center 6) availability of land for forage 		

procurement (in case of independent procurement).		
<p>A farm with a forage-fed herd of 400 cows (capacity shall be determined according to technical documentation and/or the actual availability of forage-fed cows): a commercial dairy farm that has been put into operation or has undergone modernization with the appropriate infrastructure, having:</p> <p>1) a building for keeping cows; 2) equipment for automated or machine milking, including portable milking units; 3) feed distribution and watering;</p> <p>4) a feed shop; 5) a veterinary station</p> <p>.</p>		
<p>A farm with a forage herd of 50 cows: a dairy farm (capacity shall be determined according to technical documentation and/or the actual availability of forage cows), which shall have:</p> <p>1) a room for keeping cows; 2) machine milking, including portable milking units; 3) a place for storing veterinary drugs; 4) a cattle locker.</p>		
<p>Agricultural production cooperative engaged in milk procurement:</p> <p>1) availability of its milk collection point or its own/rented milk tanker; 2) availability of machine milking equipment, including portable milking units (for members of the agricultural production cooperative that are agricultural entities (peasant farms/farming enterprises).</p>		
<p>Poultry meat farm (capacity shall be determined according to technical documentation and/or actual production for the past year (based on annual statistical data in form 24-cx, for manufacturers operating for less than 12 months, the actual production volume shall be determined based on the actual declared volume of manufactured products, divided by the period of operation in months and multiplied by twelve months):</p> <p>1) availability of equipment/rooms for keeping birds, an automated</p>		

feeding system, water supply, ventilation, and a poultry slaughter line (slaughterhouse); 2) availability of one of the following certificates: HACCP food safety system (from English HACCP - Hazard Analysis and Critical Control Points - an international standard developed and adopted for risk analysis and critical control points; ISO (from the English ISO – International Standard for Organization – an international standard developed and adopted by the World Federation of National Standards Organizations).

Based on the inspection results, a checkmark shall be placed on the corresponding column for each infrastructure criterion separately.

Conclusion of the special commission
