Chapter 1. General provisions

1. These rules, criteria for payments to donors who donate blood and its components on a reimbursable basis are developed in accordance with paragraphs 7 and 9 of Article 208 of the Code of the Republic of Kazakhstan “On Public Health and the Healthcare System” as of July 7, 2020 and establish the procedure, criteria for payments donors who donate blood and its components on a reimbursable basis.

Chapter 2. Rules, criteria for payments to donors who donate blood and its components on a reimbursable basis

2. The blood service facility makes a payment to a donor who donated blood and its components on a reimbursable basis, and also pays the monetary value of a free meal to a donor who donated blood and (or) its components on a gratuitous basis.

3. A payment is made in two ways: in cash and through a bank.

Payment in cash is made on the day of donation of blood and its components; payment through a bank within two banking days of donation of blood and its components.

In case of payment through a bank, a donor provides a document confirming the opening of a current account in the card database of second-tier banks.

4. In case of visual identification of lacteous serum (cloudy, opalescent, from whitish to milky) in plasma from a paid donor after its separation from blood cells by centrifugation during plasma donation, payment is not made.

5. Taking into account the needs of the blood service facility, donors are invited to donate blood and its components on a reimbursable basis, subject to the following criteria:

1) the presence of confirmed documented antigenic characteristics of blood (universal blood group according to the ABO system, Rh-negative affiliation or identity with respect to blood antigens with a potential recipient for whom blood components are procured);

2) in the event of an emergency invitation of potential donors after working hours (at night, on weekends and holidays), taking into account the necessary antigenic characteristics of the blood;

3) in the case of a long and high demand for blood components of a certain group and Rh-affiliation.
