Appendix to Order
№ KR DSM-311/2020
of the Minister of Healthcare
of the Republic of Kazakhstan as of
December 22, 2020

Rules for maintaining the register of educational programs and their inclusion therein by levels of education in the field of healthcare

Chapter 1. General provisions

1. These Rules for maintaining the register of educational programs and their inclusion therein by levels of education in the field of healthcare (hereinafter referred to as the Rules) determine the procedure for maintaining the register of higher and postgraduate educational programs (hereinafter referred to as EP) of the authorized body for education and their inclusion in the Register (hereinafter referred to as the Register).

2. The register is maintained by the authorized body for education in order to form a unified information environment for registering EPs implemented by higher and (or) postgraduate educational institutions (hereinafter referred to as HPEI).

3. The list of EPs is contained in the Register.

4. Basic terms used in these Rules are as follows:

1) the register of educational programs - the information system of the authorized body for education, which includes a list of educational programs developed by HPEI;

2) an educational program (hereinafter referred to as EP) - a single set of basic characteristics of education, including goals, results and content of education, organization of the educational process, ways and methods of their implementation, criteria for assessing learning outcomes;

3) the operator - a legal entity assigned by the authorized body for education and maintaining the Register.

5. The register is maintained by the Operator in electronic form in the “Unified Higher Education Management System” information system of the authorized body for education.

6. Access to the register is provided via the Internet.

7. The information contained in the register is open and available for inspection by persons concerned.

Chapter 2. The procedure for including educational programs in the field of healthcare in the Register

8. It takes three stages to include educational programs in the Register such as:

1) submission of an application for including an EP in the Register (hereinafter referred to as the application) and an EP passport by an educational institution;

2) examination of the EP;

3) entering the educational program into the Register.

9. To include an educational program in the Register, an educational institution submits to the Operator:

1) an electronic application;

2) an EP passport.

10. The Operator approves the application of the educational institution and checks its correctness within 5 (five) working days. An incorrectly completed application is returned to the educational institution for revision, indicating the reasons.

11. It is required to examine an EP in order to assess its quality. An expert is appointed with account of a possible conflict of interest in the course of the EP's examination; it is necessary to disclose all relations that are considered as a potential conflict of interest. In the event of identification of a conflict of interest, the expert is barred from examining the EP.

12. The expert assesses the EP for its compliance with basic requirements of the state higher educational standard and compliance with the formation of professional competencies in a field of training.

13. If necessary, the expert requests additional documents by e-mail and also sends documents to the educational institution for revision.

14. After the examination, the expert makes a decision to "include" or "not include" the EP in the Register.

15. The EP is included in the Register in case of a positive opinion.

16. The EP is sent for revision in case of a negative opinion.

17. The educational institution submits applications for updating a current educational program to the Register in order to improve the quality of the EP.
